Civilian Response to Active Shooter Events

Officers teaching CRASE are trained through Advance Law Enforcement Rapid Response Training (ALERT™). The Civilian Response to Active Shooter Events (CRASE) course is designed and built on the Avoid Deny Defend™ strategy developed by ALERT in 2004.

Per the US Department of Homeland Security, “an Active Shooter is an individual or individuals actively engaged in killing or attempting to kill people in a confined and populated area; in most cases, active shooters use a firearm (s) and there is no pattern or method to their selection of victims.” If you experience an active shooter event, follow the Avoid Deny Defend strategy:

Avoid starts with your state of mind

- Pay attention to your surroundings
- Have an exit plan
- Move away from the source of the threat as quickly as possible
- The more distance and barriers between you and the threat, the better

Deny when getting away is difficult or impossible

- Keep distance between you and the source
- Locking doors is good, barricading them is better
- Turn the lights off
- Remain out of sight and quiet by hiding behind large objects and silence your phone

Defend because you have the right to protect yourself

- If you cannot Avoid or Deny, be prepared to defend yourself
- Be aggressive and committed to your actions
- Do not fight fairly
- Use the element of surprise if possible
